Unplugged Coding Game Board with Cut-Out Pictures

Name: _____ Date: _____

Print, cut out the pictures on page 2 and play: one player builds a puzzle on the board, the other writes the code with arrow cards.

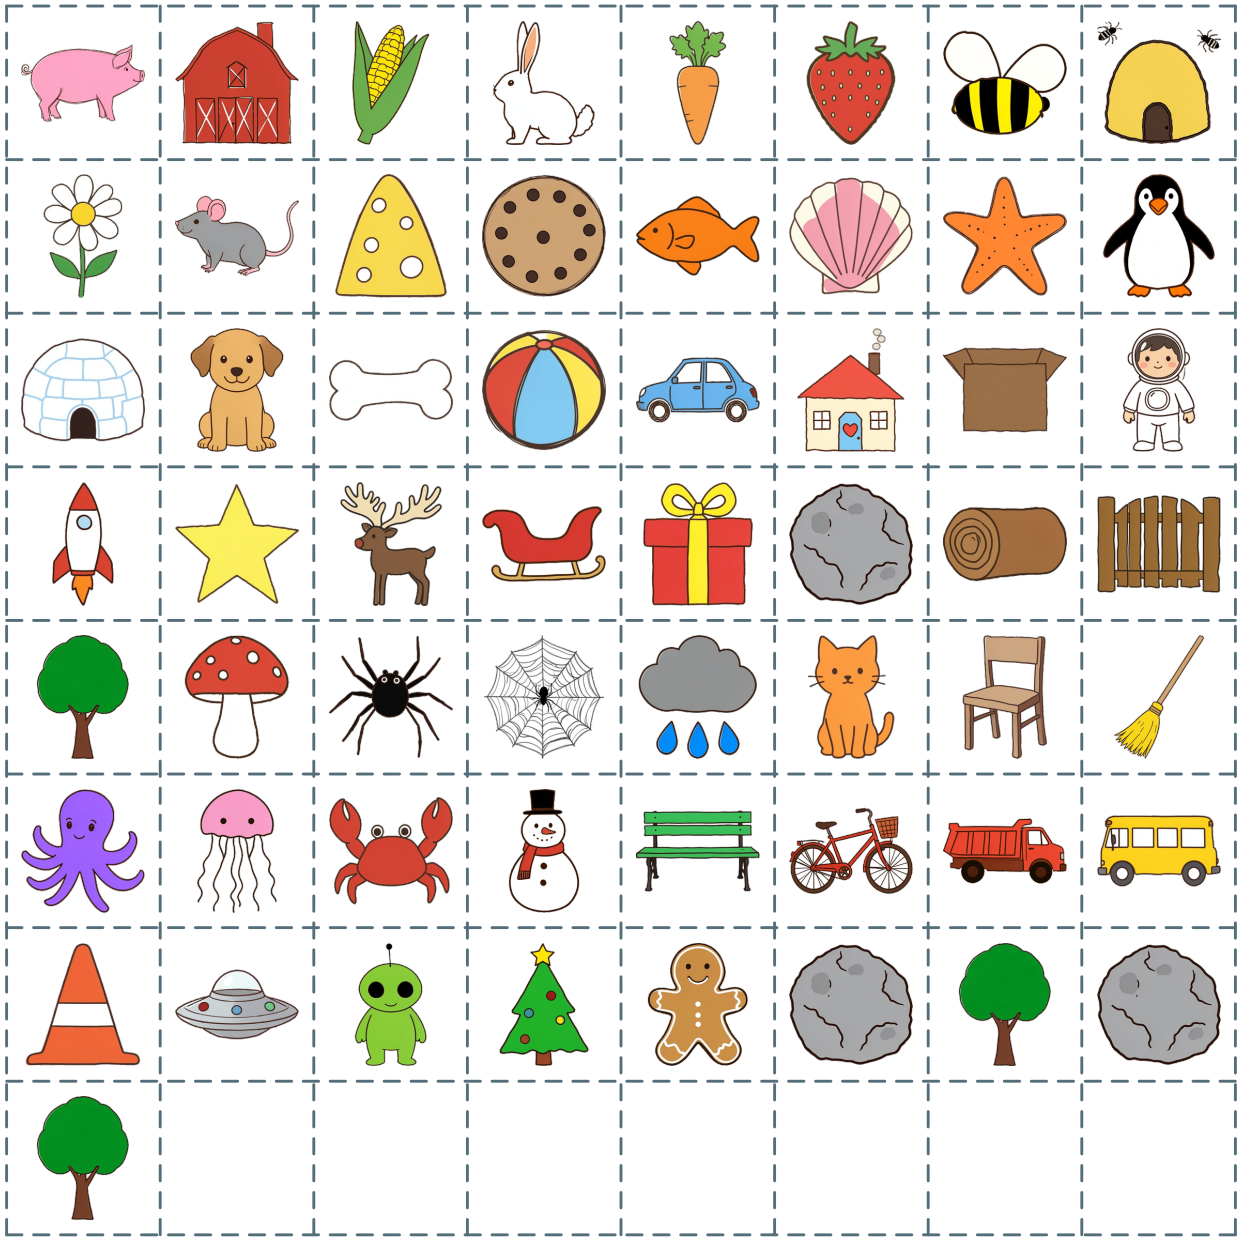

How to play

1. Cut out the pictures on page 2. Put a hero and its goal on the board, then add two or three things in the way.
2. The coder lays arrow cards in a row (or writes the arrows on paper): one arrow moves one square.
3. Run the code: move the hero one square for each card. Bumping into something means the code needs a fix.
4. Swap jobs. For a harder round, add treats to pick up first, or use x2 and x3 repeat cards.

Unplugged Coding Game Board with Cut-Out Pictures

Cut-Out Pictures

Print, cut out the pictures on page 2 and play: one player builds a puzzle on the board, the other writes the code with arrow cards.

Tip: glue this page on card stock before cutting, and keep the pictures in a zip bag with the arrow cards for the next game.
