

Multiplication and Division Fact Families (Set 2)

Name: _____ Date: _____

Use the three numbers to write two multiplication and two division facts.

9 45 5

____ × ____ = ____

____ × ____ = ____

____ ÷ ____ = ____

____ ÷ ____ = ____

6 24 4

____ × ____ = ____

____ × ____ = ____

____ ÷ ____ = ____

____ ÷ ____ = ____

10 30 3

____ × ____ = ____

____ × ____ = ____

____ ÷ ____ = ____

____ ÷ ____ = ____

7 70 10

____ × ____ = ____

____ × ____ = ____

____ ÷ ____ = ____

____ ÷ ____ = ____

6 54 9

____ × ____ = ____

____ × ____ = ____

____ ÷ ____ = ____

____ ÷ ____ = ____

5 15 3

____ × ____ = ____

____ × ____ = ____

____ ÷ ____ = ____

____ ÷ ____ = ____

Multiplication and Division Fact Families (Set 2)

Answer Key

Use the three numbers to write two multiplication and two division facts.

A house-shaped diagram with a pink roof. The roof contains a red circle with the number 45, and two white circles with the numbers 9 and 5. The body of the house contains four equations:

$$\begin{array}{l} \underline{9 \times 5 = 45} \\ \underline{5 \times 9 = 45} \\ \underline{45 \div 9 = 5} \\ \underline{45 \div 5 = 9} \end{array}$$

A house-shaped diagram with a light blue roof. The roof contains a blue circle with the number 24, and two white circles with the numbers 6 and 4. The body of the house contains four equations:

$$\begin{array}{l} \underline{6 \times 4 = 24} \\ \underline{4 \times 6 = 24} \\ \underline{24 \div 6 = 4} \\ \underline{24 \div 4 = 6} \end{array}$$

A house-shaped diagram with a light green roof. The roof contains a green circle with the number 30, and two white circles with the numbers 10 and 3. The body of the house contains four equations:

$$\begin{array}{l} \underline{10 \times 3 = 30} \\ \underline{3 \times 10 = 30} \\ \underline{30 \div 10 = 3} \\ \underline{30 \div 3 = 10} \end{array}$$

A house-shaped diagram with a pink roof. The roof contains a pink circle with the number 70, and two white circles with the numbers 7 and 10. The body of the house contains four equations:

$$\begin{array}{l} \underline{7 \times 10 = 70} \\ \underline{10 \times 7 = 70} \\ \underline{70 \div 7 = 10} \\ \underline{70 \div 10 = 7} \end{array}$$

A house-shaped diagram with a yellow roof. The roof contains a yellow circle with the number 54, and two white circles with the numbers 6 and 9. The body of the house contains four equations:

$$\begin{array}{l} \underline{6 \times 9 = 54} \\ \underline{9 \times 6 = 54} \\ \underline{54 \div 6 = 9} \\ \underline{54 \div 9 = 6} \end{array}$$

A house-shaped diagram with a pink roof. The roof contains a red circle with the number 15, and two white circles with the numbers 5 and 3. The body of the house contains four equations:

$$\begin{array}{l} \underline{5 \times 3 = 15} \\ \underline{3 \times 5 = 15} \\ \underline{15 \div 5 = 3} \\ \underline{15 \div 3 = 5} \end{array}$$
