Dots and Boxes 10x10 Game Board

100 boxes: a long game for patient players.

How to Play

1. Take turns drawing one line between two dots that sit side by side (across or up and down, never corner to corner).
2. If your line closes the fourth side of a box, write your initial inside it and take another turn.
3. When every box is closed, count your boxes. The player with the most boxes wins.

Player 1: _____ Score: ☐ **Player 2:** _____ Score: ☐

Tip: try not to draw the third side of a box. Your partner will close it!
