Dots and Boxes Math Game: Number Boxes

Every box has a point value from 1 to 5. Add them up to win!

How to Play

1. Take turns drawing one line between two dots side by side (never corner to corner).
2. Close the fourth side of a box: write your initial small in a corner of it and take another turn.
3. Each box is worth the number inside it. At the end, add up your numbers: the higher total wins.

Player 1: _____ Score: ☐ **Player 2:** _____ Score: ☐

Tip: try not to draw the third side of a box. Your partner will close it!
