Five in a Row Grid Game (Gomoku-Style)

An old game from Asia, played on graph paper: get five marks in a line.

How to Play

1. Player 1 draws X, player 2 draws O. X goes first, in the middle square if you like.
2. Take turns marking any empty square of the 15 by 15 grid.
3. Five of your marks in a straight line (across, down or slanting) wins. Block your partner's lines of three and four!

X: _____ O: _____
