Ultimate Tic Tac Toe Printable

Nine games inside one big game: the tic tac toe that grown-ups can't always win.

How to Play

1. The big board has nine small grids. X starts in any square of any small grid.
2. The square you pick sends your partner to the matching small grid (top-right square: top-right grid).
3. Win a small grid with three in a row: draw a big X or O over it. If you are sent to a grid that is won or full, play anywhere.
4. Win three small grids in a row on the big board to win the game.

X: _____ O: _____
